

# Environmental Program Awards

## 2016

- Airports Carbon Accreditation Program – Level II certification for PDX, HIO and TTD airports recognizes reductions in carbon emissions in airport operations, with the ultimate goal of becoming carbon neutral
- Climate Registered™ - The Port uses The Climate Registry's robust voluntary GHG reporting program to measure, publicly report and provide third-party verification for its carbon footprint
- Sustainability at Work – Gold Certification, Port of Portland Headquarters Building, Sustainability at Work (City of Portland Bureau of Planning and Sustainability)
- Top 10 in the Local Governments category and in the Top 100 (at # 78) among 100% Green Power Purchasers under the U.S. Environmental Protection Agency's program
- Recycler of the Year "Carpet" Diem Award, Association of Oregon Recyclers
- PDX Carpet Replacement Project received 3rd Place in the Public Works category, Daily Journal of Commerce 2016 Top Projects
- PDX Carpet Replacement Project received Gold in Environmental Achievement, Starnet Commercial Flooring Design Award
- PDX Carpet Replacement Project received Silver in People's Choice, Starnet Commercial Flooring Design Awards
- Environmental Equity Award – Presented by the N/NE Business Association (NNEBA) for the Port's ongoing commitment to fostering sustainability in their business practices and in the community

## 2015

- Port-wide ISO 14001 EMS independent third-party verified certification, Nov. 2014. From the independent third-party auditors: "This EMS is the most comprehensive, advanced and effective to be audited by this audit team with a combined 38 years of experience auditing the ISO 14001 standard."
  - Top 10 in the Local Government category and in the Top 100 (at # 72) among 100% Green Power Purchasers under the U.S. Environmental Protection Agency's program
  - Airports Carbon Accreditation program certified PDX, HIO, and TTD making them the fourth, fifth and sixth airports in North America to achieve the status. The program provides a framework for the airports to commit to reducing carbon emissions from their operations with the ultimate goal of becoming carbon neutral
