<b>GENERAL AVIATION SPILL RESPONSE PROCEDURES</b>	
09-20-2007	Version prior to 2012 update
03-09-2012	Updated Incident Command responsibilities and associated training requirements (Environmental dept. will no longer be delegated this responsibility); updated key contact info./numbers; updated related flowcharts for consistency with current work instructions. Added updated drainage maps. Incorporated labeling requirement reference language from the current Stormwater General Permit requirements.
05-08-2012	Minor correction – no signature update needed. Added HIO Site Maps to Appendix A.

# ***GENERAL AVIATION SPILL RESPONSE PROCEDURES***

## **1.0 POLICY STATEMENT**

The Port of Portland (Port) will follow a standard set of procedures to quickly and efficiently respond to spills of hazardous and non-hazardous materials at the Port's General Aviation (GA) airports. The Port's principal goals in establishing these procedures are to ensure that the public, Port employees, tenants, and contractors (including those responding to spills) are protected from undue exposure to these materials; to protect the environment that may otherwise be impacted by these spills; to protect property; and to minimize operational disruptions caused by spills. This plan was developed to be consistent with the Port's Environmental Management System and safety procedures.

It is the duty of the party responsible for the spill to perform appropriate cleanup and reporting. In the event that the responsible party is unwilling or unable to clean up the spill, the Port will arrange for the cleanup of the spill and the responsible party will be billed for the cleanup cost.

**In the event of a spill, contact the PDX Communications Center  
Telephone No. 503-460-4000**

## **2.0 INTRODUCTION**

In the course of doing business at GA airports there is a potential for spills and accidental release of hazardous material within the airport boundaries. The following Spill Response Procedures (SRPs) have been developed for GA airports to deal with these incidents. The SRPs detail the following:

- Roles, responsibilities, communication, and reporting procedures;
- Labeling requirements;
- Spill response procedures;
- Spill cleanup, removal, and disposal procedures;
- Training requirements; and
- Equipment.

## **2.1 Background/History**

The Occupational Safety and Health Administration (OSHA) definitions of an emergency response and incidental releases under HAZWOPER (Hazardous Waste Operations and Emergency Response) are as follows:

- “**Emergency response**” or “**responding to emergencies**” means a response effort by employees from outside the immediate release area or by other designated responders (i.e., mutual aid groups, local fire departments) to an occurrence that results, or is likely to result, in an uncontrolled release of hazardous materials.
- “**Responses to incidental releases**” means the response to a hazardous substance release where the substance can be absorbed, neutralized, or otherwise controlled at the time of release by employees in the immediate release area, or by maintenance personnel *are not considered to be emergency responses* within the scope of this standard. Responses to releases of hazardous substances where there is *no potential safety or health hazard* (i.e., fire, explosion, or chemical exposure) are not considered to be emergency responses.

Other background information that plays a key role in the history of spill response at GA airports includes:

- GA airports are multi-employer work sites and each individual employer is the Responsible Party (RP) in the event that his/her product is spilled/released or if his/her employee spills/releases a material.
- The most common materials spilled/released at GA airports are vehicle fluids, fuels, and sewage.
- Tenants and construction contractors account for the majority of the spills/releases that occur at GA airports.
- The Port Environmental department is responsible for ensuring agency notification by tenants, construction contractors, ground service companies, and the Port, and for the oversight and containment of spills/releases that may impact waterways and out-falls. Local fire departments or emergency responders provide initial incident command and control for spills/releases.

## ***2.2 Geographic Jurisdiction of These Procedures***

These SRPs apply to spills within the perimeter of the GA airport's facility fence, as well as Port property outside the fence adjacent to any of the Port's general aviation airports.

# **3.0 PERSONNEL ROLES, LINES OF AUTHORITY, AND COMMUNICATIONS**

## ***3.1 PDX Communications Center***

- Serves as initial Port point of contact for receiving reports of Emergency/Hazardous Material and fuel spills, or for Non-hazardous/Incidental Spills requiring direction or assistance at GA airports; and
- Triage of all calls and contact with local emergency responders (9-1-1), Port Environmental department, GA Operations and Maintenance, and/or RP (tenant or contractor), as appropriate for response and cleanup.

## ***3.2 Port Environmental Department***

- Develop, maintain, and review the GA airport Spill Response Program;
- Maintain Environmental staff for response to Hazardous Material Spills;
- Maintain required records for Emergency/Hazardous Material Spills;
- Serve as liaison to regulatory agencies;
- Prepare reports and records as required by regulatory agencies;
- Arrange for appropriate emergency/hazardous material spill response training for Port employees;
- Provide guidance to tenants and contractors for spill response and cleanup when necessary; and
- Contact Emergency Response Contractors as needed.

## ***3.3 General Aviation Maintenance***

- Contact the PDX Communications Center when an Emergency/Hazardous Material Spill is discovered, or when direction or assistance is required on a Non-emergency/Incidental Spill;

- Maintain and train the GA maintenance staff for response to Non-emergency/Incidental Spills and/or Emergency/Hazardous Material Spills that impact operations;
- Clean up Non-emergency/Incidental Spills and/or Emergency/Hazardous Material Spills within the scope of training;
- Notify Port Environmental department and/or Emergency Response Contractors, as appropriate;
- Assist in spill equipment and supply stocking/restocking and maintenance; and
- Complete and maintain appropriate records.

### ***3.4 General Aviation Operations***

- Contact the PDX Communications Center when an Emergency/Hazardous Material Spill is discovered, or when direction or assistance is required on a Non-emergency/Incidental Spill;
- Maintain spill response training for Operations personnel;
- Assist in cleanup of Non-emergency/Incidental Spills and/or Emergency/Hazardous Material Spills as directed by the Incident Commander and in accordance with equipment, training, and materials (when available);
- Notify Port Environmental department and/or Emergency Response Contractors, as appropriate; and
- Oversee Port/tenant/RP cleanups, as appropriate.

### ***3.5 GA Department Managers, Supervisors, Superintendents, Leads, and Employees***

- Ensure all containers are clearly and properly labeled in order to support appropriate spill response (refer to the Port-wide Labeling Work Instruction for additional detail);
- Contact the PDX Communications Center when an Emergency/Hazardous Material Spill is discovered, or when direction or assistance is required on a Non-emergency/Incidental Spill;
- Maintain HazCom and Spill Response training for designated staff; and
- Clean up or oversee clean up of incidental spills in their area, as appropriate.

### **3.6 GA Tenants, Construction Contractors, and Service Providers**

- Ensure all containers are clearly and properly labeled in order to support appropriate spill response (refer to the Port-wide Labeling Work Instruction for additional detail);
- Contact the PDX Communications Center when an Emergency/Hazardous Material Spill is discovered, or when direction or assistance is required on a Non-emergency/Incidental Spill;
- Contain, clean up, and dispose of all Emergency/Hazardous Material and Non-emergency/Incidental Spills that they cause;
- Train personnel in accordance with HazCom requirements and the GA airport Spill Response Procedures;
- Maintain appropriate cleanup materials and equipment;
- Maintain records of spill response actions; and
- Report all regulated spills to the appropriate regulatory agencies and to the Port Environmental department.

### **3.7 Emergency Response Contractors**

- Provide environmental cleanup services when requested by General Aviation Operations and Maintenance, Port Environmental department, or the PDX Communications Center; and
- Maintain a response crew with security access badges and appropriate training.

## **4.0 SPILL RESPONSE PROCEDURES**

The GA airport Spill Response Procedures are broken into two levels of response:

- Non-emergency/Incidental Spills, and
- Emergency/Hazardous Material Spills.

### **4.1 Non-emergency / Incidental Spills**

Most spills at GA airports are Non-emergency/Incidental Spills. These spills do not require a HAZMAT response and meet the OSHA definition in the 29 CFR 1910.120 Hazardous Waste Operations and Emergency Response standard as follows:

“Responses to incidental releases of hazardous substances where the substance can be absorbed, neutralized, or otherwise controlled at the time of release by employees in the immediate release area, or by maintenance personnel are not considered to be emergency responses within the scope of this standard.

Responses to releases of hazardous substances where there is no potential safety or health hazard (i.e., fire, explosion, or chemical exposure) are not considered to be emergency responses.”

Port contractors, tenants, maintenance or operations personnel will respond to, contain, and clean up Non-emergency/Incidental Spills. Tenants, construction contractors, and service providers are responsible for the cleanup of any spills they cause or discover in their area. Port Emergency Response Contractors will clean up Non-emergency/Incidental Spills when so directed.

Examples of Non-emergency/Incidental Spills include:

- Non-hazardous materials;
- Vehicle fluids (oil, radiator fluid, gasoline, diesel, brake fluid, etc.) spill that can be contained by employees in immediate area;
- Jet fuel spills that can be contained by employees in the immediate area; and
- Bio-hazard/sewage spills that can be contained by employees in the immediate area.

## ***4.2 Emergency/Hazardous Material Spills***

Emergency/Hazardous Material Spills are spills that require a coordinated response from the local emergency responders and/or the Port Environmental department.

These spills include hazardous materials, which present a potential safety or health hazard (i.e., fire, explosion, or chemical exposure), or a spill that adversely impacts operations or may enter the waterway.

Examples of Emergency/Hazardous Material Spills include:

- Hazardous or Non-hazardous Material Spills, which significantly impact airfield operations or vehicle roadways (closing airfield pavements, require the shutting down of vehicle traffic lanes or restrict access to essential services);
- Hazardous materials that present safety or health hazards (fire, explosion, chemical exposure); and

- Uncontained fuel spills that present a fire hazard or that may impact waterways.

#### ***4.3 Implementation of Spill Procedures***

The GA airport Spill Response Procedures will be implemented in the event of any release or spill. The type of spill (Non-emergency/Incidental or Emergency/Hazardous Material) as detailed in this procedure will determine the response to the release.

#### ***4.4 Judgment and Control Criteria for Spills and Emergency Response***

Non-emergency/Incidental Spills will be cleaned up by the RP. In the event that the RP is unwilling or unable to clean up the spill, the Port will arrange for clean up of the spill and the RP will be responsible for the cleanup cost.

The local Emergency Responders/ Fire Department will be contacted and will take initial control of all Emergency/Hazardous Material Spills, establish an Incident Command structure, and determine if additional contract cleanup resources are required. Port Environmental department determine, in consultation with the local emergency responder/Incident Commander, if the Port's emergency response contractor be dispatched to address the incident.

#### ***4.5 Containment, Cleanup, and Removal/Disposal***

Containment, cleanup, and removal/disposal of spills that occur in the Geographical Jurisdiction of These Procedures per Section 2.2, will be executed and/or administered by the RP, with possible oversight by the Port Environmental department, or operations personnel.

Tenants, construction contractors, and service providers will be charged for the damage their spills cause to property (e.g., asphalt damage from fuel spills). They will also be charged for cleanup operations conducted on their behalf by the Port.

<b>Non-emergency/Incidental Spills</b>	<b>Emergency/Hazardous Material Spills</b>
1. Spill occurs – identified as Non-emergency/Incidental.	1. Spill occurs – identified as Emergency/Hazardous Material.
2. Responsible Party (RP) cleans up spill.	2. Person discovering the spill contacts the PDX Communications Center, <b>Phone No. 503-460-4000</b> to triage the event <b>and</b> calls the local emergency response center Phone No. 9-1-1.
3. If the RP cannot clean up the spill, they will	3. The PDX Communications Center notifies the Port

contact the PDX Communications Center <b>Phone No. 503-460-4000</b> , which will then notify other Port departments as appropriate for cleanup oversight.	Environmental department, GA management, or other departments, as appropriate.
4. If Port cleanup/containment materials are used, the RP notifies Port General Aviation Maintenance. General Aviation Maintenance notifies Port Environmental department for their replacement	4. Local emergency responders respond to spill and determine type and status of spill and will act as the Incident Commander. Port Environmental department determine, in consultation with the local emergency responder/Incident Commander, if the Port's emergency response contractor be dispatched to address the incident.
5. RP maintains appropriate spill incident records, and notifies regulatory agencies, as appropriate.	5. Incident Commander determines if additional support or resources are needed.
	6. Spill is cleaned up with local fire department, Port Environmental department, Port Operations, or City oversight.
	7. The Incident Commander, Port and/or RP maintains appropriate records and reporting.

## **5.0 TRAINING**

### ***5.1 Hazard Communication/Awareness Training - Non-emergency/Incidental Spill***

Appropriate Port personnel, tenants, construction contractors, and service providers will receive Hazard Communication training in accordance with 29 CFR 1910.1200. They will also receive basic awareness training on the GA airport Spill Response Procedures. Personnel with this training can respond to and clean up any Non-emergency/Incidental Spill.

### ***5.2 Emergency/Hazardous Materials Spill Response Training***

The Port Environmental Department will have training that meets the requirements of 29 CFR 1910.120 (q) for Hazardous Materials Awareness and Operations.

Incident Commanders must have appropriate Incident Command Training and 24- or 40-hour HAZWOPER training.

### ***5.3 40-Hour HAZWOPER***

PDX Emergency Response Contractors who conduct remediation or final cleanup of Emergency/Hazardous Material Spills at GA airports must have 40-hour HAZWOPER training meeting the requirements of 29 CFR 1910.120 (e).

## **6.0 EQUIPMENT**

### ***6.1 Port Equipment***

GA Maintenance and Port Environmental department will cooperatively purchase, maintain, and restock appropriate spill cleanup and containment equipment. This equipment will include absorbent materials and a limited amount of PPE (boot covers, gloves, and disposable coveralls). The cleanup kits will be sited at secure locations for access by Port personnel and Emergency Response Contractors. PDX also maintains a Spill Response Mobile Unit. This unit is located at the PDX Maintenance facility and can be mobilized to GA airports in the event of a spill.

### ***6.2 Non-Port Equipment***

Tenants, construction contractors, and service providers are responsible for securing and maintaining the appropriate equipment for responding to and cleaning up spills they cause. For larger spills, they may depend on local cleanup contractors.

## **7.0 EMERGENCY RESPONSE CONTRACTORS**

Emergency Response Contractors may be called by the Port Environmental department or GA Operations and Maintenance for cleanup of spills. Port of Portland Emergency Response Contractors are listed in an appendix of these procedures.

## **8.0 TENANTS, CONSTRUCTION CONTRACTORS, AND OTHER SERVICE PROVIDERS**

Tenants, construction contractors, and service companies must have a spill response plan for their operations, if required by law or pursuant to all applicable agreements with the Port. The plan must include required OSHA items such as training, equipment, and available outside resources.

## **9.0 REGULATORY REPORTING REQUIREMENTS**

### ***9.1 Tenants, Construction Contractors, and Service Providers***

These entities are responsible for reporting any spills they cause that meet regulatory (DEQ/EPA) reporting requirements. They must report to the appropriate regulatory agency and the Port Environmental department.

### ***9.2 Port***

The Port Environmental department will notify the appropriate regulatory agency of regulated spills caused by the Port as well as those not reported by RPs, to the extent it has actual knowledge that it has not been reported.

## **10.0 DEFINITIONS**

- “**Bio-hazard/Sewage Spills**” are spills of raw sewage or other materials that may contain "Bloodborne Pathogens." OSHA defines "Bloodborne Pathogens" as pathogenic microorganisms that are present in human blood and can cause disease in humans. These pathogens include, but are not limited to, hepatitis B virus (HBV) and human immunodeficiency virus (HIV).
- “**Communications Center**” is located at PDX’s main terminal and is the central notification number for all Emergency/Hazardous Material Spills/Releases. The

PDX Communications Center can be reached at: Emergency 503-460-4000, Non-emergency 503-460-4747.

- “**Cleanup Operation**” (in relation to Emergency/Hazardous Material Spills) means an operation where hazardous substances are removed, contained, incinerated, neutralized, stabilized, cleaned up, or in any other manner processed or handled with the ultimate goal of making the site safer for people or the environment.
- “**Emergency/Hazardous Material Spill**” means a spill that may impact a waterway or Port Operations or presents a potential safety or health hazard such as fire, explosion, or chemical exposure.
- “**Emergency Response**” means a response effort by employees from outside the immediate release area or by other designated responders (i.e., mutual aid groups, local fire departments, etc.) to an occurrence, which results or is likely to result in an Emergency/Hazardous Material Spill.
- “**Emergency Response Contractors**” are companies that have appropriately trained personnel and equipment to respond to, and clean up Emergency/Hazardous Material Spills.
- “**Environmental Receptors**” are areas potentially at risk for environmental contamination from a hazardous substance or petroleum product release. Environmental Receptors may include soil, groundwater, sediments, and surface waters, storm drains, quiescent ponds, and retention ponds.
- “**First Responder**” is the person who witnesses or discovers the spill. This person’s primary responsibility is to clean up the spill, if practical. Also, the First Responder contacts the Communications Center when an Emergency/Hazardous Material (including fuel spills) is discovered, or when direction or assistance is required on a Non-emergency/Incidental Spill.
- “**Hazard Communication**” refers to the OSHA 29 CFR 1910.1200 Hazard Communication or Worker “Right-to-Know” law that includes chemical labeling, training, and work practice requirements.
- “**Hazardous Material/Substance**” includes any and all substances defined or designated as hazardous, toxic, radioactive, dangerous or regulated wastes or materials or any other similar term in or under any applicable laws and

regulations. Hazardous Substance shall also include, but not be limited to, fuels, petroleum and petroleum derived products.

- “**Hazardous Material/Hazardous Substance Release**” shall be interpreted in the broadest sense to mean the spilling, discharge, deposit, injection, dumping, emitting, releasing, leaking, placing, or seepage of any Hazardous Substance into the air or into or on any land or waters, except as specifically authorized by a current and valid permit issued under applicable Environmental Law.
- “**Hazardous Materials Response (HAZMAT) Team**” is a team with appropriate training and equipment who are expected to perform work to handle and control actual or potential leaks or spills of hazardous substances requiring possible close approach to the substance. The team members perform responses to releases or potential releases of hazardous substances for the purpose of control or stabilization of the incident. The Port of Portland uses the Portland Fire Department HAZMAT team (or the Tualatin Valley or Gresham Fire Department HAZMAT teams) when necessary.
- “**Incident Commander**” is the individual responsible for coordinating the emergency response for Emergency/Hazardous Material Spills and determining if the spill is hazardous. Qualified individuals are trained in the Incident Command System and have at least completed the 24-hour Hazardous Waste Operations and Emergency Response Training in accordance with the HAZWOPER standard, 29 CFR 1910.120 (q) (6).
- “**Non-emergency/Incidental Spills**” means any spill that does not meet the definition of an “Emergency/Hazardous Material Spill.”
- “**PDX**” is the Portland International Airport.
- “**Reportable Quantity**” is defined as the quantity of hazardous material or petroleum product that must be reported to EPA or DEQ if released into the environment. The reportable quantities of hazardous substances are specified in 40 CFR Part 117.3 (listing also included in Appendix A). In the case of petroleum or oil-related products, DEQ regulations define a reportable quantity as any volume equal to or greater than 42 gallons of oil spilled on the ground surface, or if in water, any quantity. The specific reportable quantity may be determined from the material’s Material Safety Data Sheet (MSDS).
- “**Responsible Party (RP)**” is defined as the individual or company whose operations or equipment caused the spill or release. If there is a dispute in

determining the RP, the owner of the leasehold will be the default RP and subsequently responsible for the cleanup of the spill.

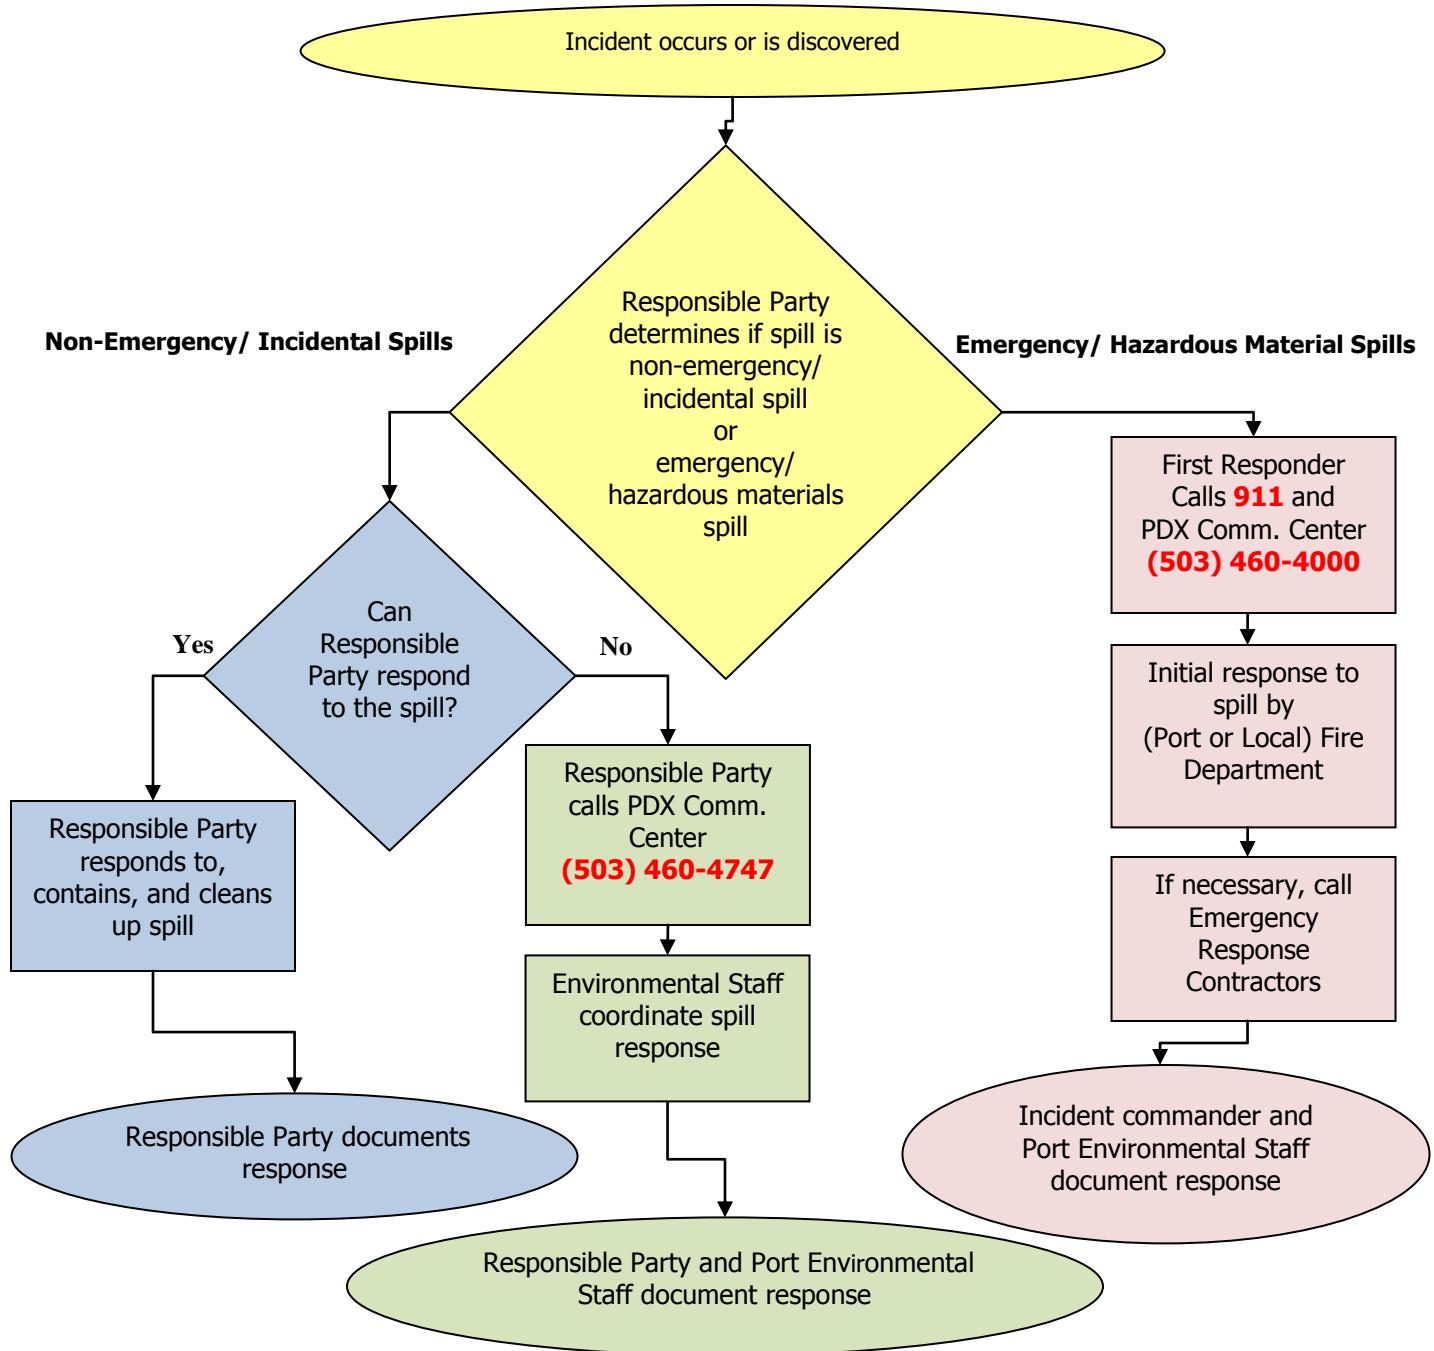

- “**Waterway Impact Spills**” are any spills that may impact the water/environmental receptors.
- “**40-hour HAZWOPER**” refers to the training requirements detailed in 29 CFR 1910.120 (e) for environmental cleanup contractors.

[Note: All Comments/Notes Are Located at the End of This Table]

Hazardous substance	CASRN	Statutory code†	RCRA waste No.	Final RQ pounds (Kg)
Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of pentachlorophenol or of intermediates used to produce its derivatives.				
F022 .....		4	F022	1 (0.454)
Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tetra-, penta-, or hexachlorobenzenes under alkaline conditions.				
F023 .....		4	F023	1 (0.454)
Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production of materials on equipment previously used for the production or manufacturing use (as a reactant, chemical intermediate, or a component in a formulating process) of tri- and tetrachlorophenols. (This listing does not include wastes from equipment used only for the production or use of hexachlorophene from highly purified 2,4,5-trichlorophenol.)				
F024 .....		4	F024	1 (0.454)
Process wastes, including but not limited to, distillation residues, heavy ends, tars, and reactor clean-out wastes, from the production of certain chlorinated aliphatic hydrocarbons by free radical catalyzed processes. These chlorinated aliphatic hydrocarbons are those having carbon chain lengths ranging from one to and including five, with varying amounts and positions of chlorine substitution. (This listing does not include wastewater, wastewater treatment sludges, spent catalysts, and wastes listed in 40 CFR 261.31 or 261.32.)				
F025 .....		4	F025	1 (0.454)
Condensed light ends, spent filters and filter aids, and spent desiccant wastes from the production of certain chlorinated aliphatic hydrocarbons, by free radical catalyzed processes. These chlorinated aliphatic hydrocarbons are those having carbon chain lengths ranging from one to and including five, with varying amounts and positions of chlorine substitution.				
F026 .....		4	F026	1 (0.454)
Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production of materials on equipment previously used for the manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tetra-, penta-, or hexachlorobenzene under alkaline conditions.				
F027 .....		4	F027	1 (0.454)
Discarded unused formulations containing tri-, tetra-, or pentachlorophenol or discarded unused formulations containing compounds derived from these chlorophenols. (This listing does not include formulations containing hexachlorophene synthesized from prepurified 2,4,5-trichlorophenol as the sole component.)				
F028 .....		4	F028	1 (0.454)
Residues resulting from the incineration or thermal treatment of soil contaminated with EPA Hazardous Waste Nos. F020, F021, F022, F023, F026, and F027.

Hazardous substance	CASRN	Statutory code†	RCRA waste No.	Final RQ pounds (Kg)
Wastewaters (except those that have not come into contact with process contaminants), process residuals, preservative drippage, and spent formulations from wood preserving processes generated at plants that currently use or have previously used chlorophenolic formulations (except potentially cross-contaminated wastes that have had the F032 waste code deleted in accordance with § 261.35 of this chapter or potentially cross-contaminated wastes that are otherwise currently regulated as hazardous wastes (i.e., F034 or F035), and where the generator does not resume or initiate use of chlorophenolic formulations). This listing does not include K001 bottom sediment sludge from the treatment of wastewater from wood preserving processes that use creosote and/or pentachlorophenol.				
F034 .....		4	F034	1 (0.454)
Wastewaters (except those that have not come into contact with process contaminants), process residuals, preservative drippage, and spent formulations from wood preserving processes generated at plants that use creosote formulations. This listing does not include K001 bottom sediment sludge from the treatment of wastewater from wood preserving processes that use creosote and/or pentachlorophenol.		4	F035	1 (0.454)

Petroleum refinery primary oil/water/solids separation sludge-Any sludge generated from the gravitational separation of oil/water/solids during the storage or treatment of process wastewaters and oily cooling wastewaters from petroleum refineries. Such sludges include, but are not limited to those generated in oil/water/solids separators; tanks and impoundments; ditches and other conveyances; sumps; and stormwater units receiving dry weather flow. Sludges generated in stormwater units that do not receive dry weather flow, sludges generated from non-contact once-through cooling waters segregated for treatment from other process or oily cooling waters, sludges generated in aggressive biological treatment units as defined in § 261.31(b)(2) (including sludges generated in one or more additional units after wastewaters have been treated in aggressive biological treatment units) and K051 wastes are not included in this listing. This listing does include residuals generated from processing or recycling oil-bearing hazardous secondary materials excluded under § 261.4(a)(12)(i), if those residuals are to be disposed of.

Hazardous substance	CASRN	Statutory code†	RCRA waste No.	Final RQ pounds (Kg)
Nonwastewaters from the production of dyes and/or pigments (including nonwastewaters commingled at the point of generation with nonwastewaters from other processes) that, at the point of generation, contain mass loadings of any of the constituents identified in paragraph (c) of section 261.32 that are equal to or greater than the corresponding paragraph (c) levels, as determined on a calendar year basis				

† Indicates the statutory source defined by 1, 2, 3, and 4, as described in the note preceding Table 302.4.

‡ Indicates the statutory source defined by 1, 2, 3, and 4, as described in the note preceding Table 302.4.

§§ No reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is larger than 100 micrometers (0.004 inches).

§§§ The RQ for asbestos is limited to friable forms only.

§§§§ The Agency may adjust the statutory RQ for this hazardous substance in a future rulemaking; until then the statutory one-pound RQ applies.

§ The adjusted RQs for radionuclides may be found in Appendix B to this table.

□ Indicates that no RQ is being assigned to the generic or broad class.

\* Benzene was already a CERCLA hazardous substance prior to the CAA Amendments of 1990 and received an adjusted 10-pound RQ based on potential carcinogenicity in an August 14, 1989, final rule (54 FR 33418). The CAA Amendments specify that "benzene (including benzene from gasoline)" is a hazardous air pollutant and, thus, a CERCLA hazardous substance.

b The CAA Amendments of 1990 list DDE (3547-04-4) as a CAA hazardous air pollutant. The CAS number, 3547-04-4, is for the chemical, p,p'-dichlorodiphenylethane, DDE or p,p'-dichlorodiphenylchloroethylene. CAS number 72-55-9, is already listed in Table 302.4 with a final RQ of 1 pound. The substance identified by the CAS number 3547-04-4 has been evaluated and listed as DDE to be consistent with the CAA section 112 listing, as amended.

Includes mineral fiber emissions from facilities manufacturing or processing glass, rock, or slag fibers (or other mineral derived fibers) of average diameter 1 micrometer or less.

 d Includes mono- and di-ethers of ethylene glycol, diethylene glycol, and triethylene glycol R-(OCH<sub>2</sub>CH<sub>2</sub>)<sub>n</sub>-OR' where:

n = 1, 2, or 3;

 R = alkyl C<sub>7</sub> or less; or

R = phenyl or alkyl substituted phenyl;

 R' = H or alkyl C<sub>7</sub> or less; or

OR' consisting of carboxylic acid ester, sulfate, phosphate, nitrate, or sulfonate.

e Includes organic compounds with more than one benzene ring, and which have a boiling point greater than or equal to 100
