

# PDX RED LOT VACCINE CLINIC BY THE NUMBERS

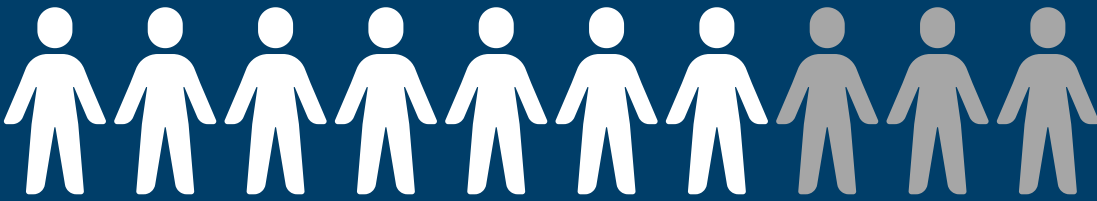

What does it take to operate an outdoor exposed clinical site on the edge of the Columbia River Gorge?

Over five months since the site first opened, staff and volunteers experienced the full repertoire of Mother Nature in the Pacific Northwest: wind storms, snow flurries, drenching rain, and broiling sun. But through their compassion, generosity and care, they helped vaccinate and make a positive difference in the lives of over 250,000 people across the region.
