See our own Troy Graham and Suzette Pump suit up for the annual honey harvest at headquarters. Our team maintains the honeybee hive located on top of our 10,000-square-foot eco-roof. Flowering sedum plants on the roof help sustain the bees, absorb rain and insulate the building. This year's honey harvest yielded nearly three gallons. Proceeds from honey sales to our team supports a non-profit scholarship fund organized by employees to help colleagues' college-bound children.
