April 4, 2018

It's no surprise since its opening nearly six weeks ago in Portland International Airport— smack dab in the middle of cold and flu season—Providence Express Care's top-selling items are aimed at helping travelers and employees feel better.

Most popular items:

- Sudafed PE
- Kleenex
- Ricola
- Advil
- Face masks

Located just past the ABC security checkpoint, Providence offers more than just over-the-counter health and wellness products. The clinic also features a telehealth kiosk where users can connect via video conference with a medical professional.

Most common conditions discussed:

- Ear pain
- Chest congestion
- Cough
- Conjunctivitis

- Bronchitis

Express care facilities are designed to bring health and wellness care to the community. In this case, community is defined quite broadly as Providence’s airport facility has treated patients from these states, and many others—Oregon, Washington, California, Alaska and New York.
