September 20, 2018

Students and recent graduates from Rosemary Anderson High School Portland Opportunities Industrialization Center paid us a visit recently as part of our career week. The event, organized by our employee-led team, introduced students to the diverse range of careers we offer. During the week, students visited 17 departments, spanning from engineering to Portland Airport Fire & Rescue, and toured the Portland International Airport airfield, Marine Terminal 6, and more. We hope the students will return next year.
